

WORKSHOP ON PUBLIC-PRIVATE RESEARCH

August, 2017

Main Messages

- ★ What does Personalized Medicine mean in this context
 - ★ Within accepted indications to find sub-groups of patients with “homogeneous” bio-types/phenotypes/endophenotypes likely to represent target populations in “contrast to one size fits all”
- ★ Private/public partnerships are essential for Personalized Medicine
 - ★ Need to reach a common understanding and share goals
 - ★ Need to solve IP rights and related contract issues
 - ★ Need to find solutions for data sharing also across borders

Questions

- ★ How do you envision we can solve contract issues and ensure common interests are clear and brought to a level where goals can be shared
- ★ What should we in Denmark do to ensure we have a good data protection in our many registries but avoid this hamper international collaboration and data sharing
